

Errata Sheet 2019

Review of the Release of Radioactive Materials from the Rio Tinto/QMM Mine Madagascar

By Stella Swanson PhD, Swanson Environmental Strategies
March 2019, Comissioned by the Andrew Lees Trust (ALT UK)

The original report was published in March 2019.
During the translation into French a number of small errors were identified. See *below*.

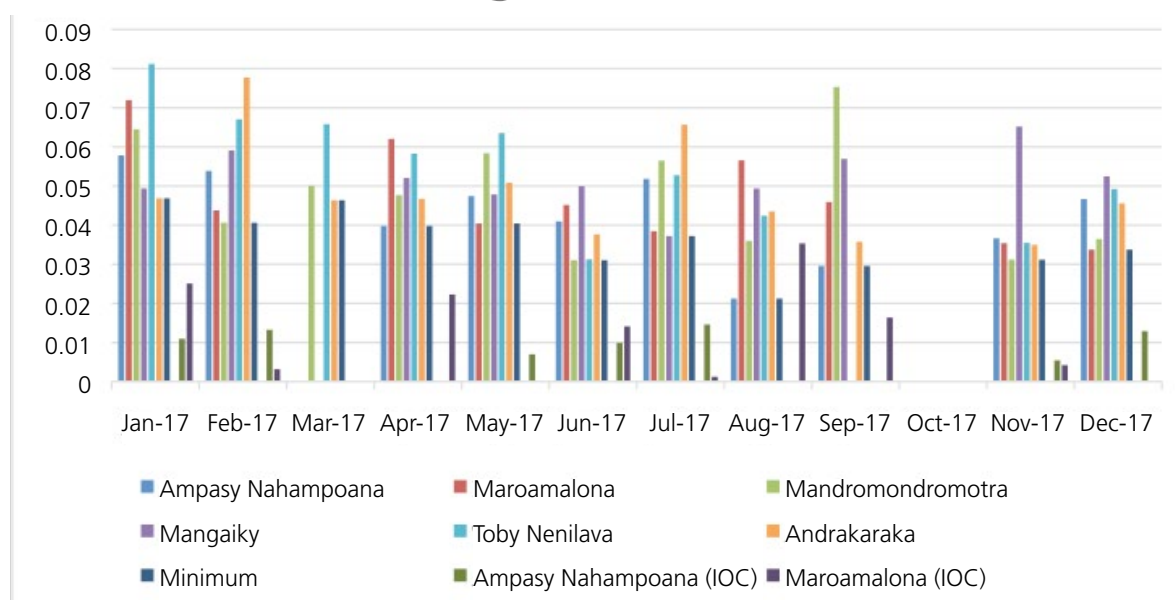

A new, revised English version of the report is available from December 2019.

Page 19 "Per capita income is very low and literacy ranges from 25% to 50%".

Page 27 "Much more sampling is required to obtain a more confident indication of the site-wide gamma dose rate post mining and whether there may be specific areas where post-mine exposure has increased."

Page 37 Table replaced and INC replaced with IOC in paragraph above.

Dust concentration mg/m³

Page 42 Removed repeated line of data in original Table 4, (the line of data immediately below the line for beta measurements).
